

# A new lease of life... because of your contribution.

**W**hen 78-year-old Mdm Chua suffered a stroke, the cheerful woman found her life descending into gloom as she could no longer live independently. Going for medical appointments at the hospital was difficult as her mobility was severely limited and she was unable to take public transport on her own.

Mdm Chua found a new lease of life when the hospital referred her to TOUCH Home Care (THC) in 2006. Since then, THC has been taking care of Mdm Chua's daily needs.

Through THC's intervention, Mdm Chua's world brightened up and her quality of life improved. Stronger physically, psychologically and emotionally, Mdm Chua can now run errands and visit friends in the neighbourhood on her mobile scooter.

TOUCH Home Care service programme is one of the seven Home Help Service programmes supported by Singapore Power (SP) Heartware Fund (see overleaf).

The programme enables needy elderly like Mdm Chua to live in their own home and age gracefully within the community.

Your donation to the SP Heartware Fund means a lot to Mdm Chua and many other needy elderly like her who have benefited from the Home Help Service programme.

Please donate generously and join us in giving the needy elderly a new lease of life.

**"With TOUCH Home Care's help, I am now more confident and happy. I am very touched that there are people out there who care about me."**

## **TOUCH Home Care arranged for:**

- Meals-on-Wheels service to deliver two healthy meals to her daily
- Transport service for her medical appointments
- Housekeeping service to help Mdm Chua with household chores
